BIG NEWS!

New Name! ★ Reduced Price!

E3 AFA™ FOR HORSES

*is now called **The Perfect Horse™!***

Same great product, same great results!

Now only \$207.95 for a full pound!

That's a whopping savings of \$32.00!

Here's the scoop:

How long will it take to see results?

Most of our clients see a difference in their horses within a period of six weeks to three months. However, each horse is different and some take longer to respond to the rich, organic, fresh-water blue green algae nutrition available to them from **The Perfect Horse™** (previously labeled E3 AFA™ FOR HORSES).

How long will the one-pound bottle last?

Our 460gm bottle (one pound) will last one horse nine months on a maintenance-feeding schedule.

What does the guarantee mean?

We back **The Perfect Horse™** with a guarantee that states that if you don't see visible results in your horse within a year of consistently feeding it, we'll refund your money. Where else can you get that kind of promise? To encourage our clients to give our product a good try and take full advantage of our unheard-of guarantee, we have lowered our price of the 460gm container (one pound) of **The Perfect Horse™** (previously labeled E3 AFA™ FOR HORSES) to

ONLY \$207.95! That's a huge savings of \$32.00!

Ask Wayne!

Wayne Blevins, founder of E3 Live™ FOR HORSES, offers his expertise from 35 years of being a professional farrier and trainer. If you have questions of Wayne, please email him at Wayne@E3LiveForHorses.

Hey Wayne,

I have a race horse in training for the turf season. Will your product improve his ability to go faster? Is this a detectable additive that will show up positive in drug testing? I'm concerned that this product will make him too calm and less likely to want to race.

— H. R., California

Hi Henry,

Good questions! We have many race horse customers who claim that their horses run better and faster with this product. However, they tend to be secretive and don't want others to know what they are using, so it's hard to get testimonials from them. As you know, horse racing professionals tend to keep their winning secrets to themselves.

The Perfect Horse™ is a whole raw food, so it will NOT test positive as a drug. As far as the product making the horse too calm, it will more than likely make him more alert and make better decisions more quickly. You'll undoubtedly see improvement in the quality of the horse's feet too.

Dear Wayne,

I asked my veterinarian about using your product, and he didn't know anything about feeding fresh water blue green algae to horses. What should I tell him? A friend of mine feeds E3 Live™ FOR HORSES AFA (now labeled "The Perfect Horse") and has seen really great results in the overall health of her horses, specifically in the hoofs. Thanks!

— L. M., New Mexico

Hi Lori,

Many of our clients ask us about blue-green algae and what it has to do with E3 Live™ FOR HORSES AFA, Aphanizomenon flos-aqua. Our product is 100% AFA, a superior blue-green algae called "The Perfect Horse™." It is not man-made or manufactured, but harvested from nature under the highest of standards before it is sent to you. AFA is an edible species of blue-green algae that has been consumed by indigenous people for thousands of years. AFA is a very nutritious, whole food containing over 64 nutrients that are easily absorbed by the body.

As with any wild-grown food, you want to be sure that you are getting 100% safe and edible AFA, harvested by the most reputable of harvesters. Our harvester not only meets, but exceeds, quality and safety standards for harvesting processes, adhering to strict Good Manufacturing Practices (GMPs) in order to maintain Certified Organic status and Kosher certification for our human products. Our products E3 Live™ FOR HORSES and The Perfect Horse™ are created from the same Organic, Kosher AFA, with the added benefit of Crystalloid Electrolyte Sea Minerals (CESM) for absorption. We believe in feeding our horses only the highest quality product available, we wouldn't offer you anything less than we would use ourselves or feed our own horses.

The links below contain the typical nutrient composition for our fresh frozen liquid, E3 Live™ FOR HORSES and the second link describes our dry crystal flakes, The Perfect Horse™.
